Research in Science & Technology

Durability properties of blended fly ash- slag geopolymer concrete as a repairing and strengthening materials	01-16
Design of agricultural high voltage adjustable switching powersupply based on PID	17-22
Performance and Emission Test of Diesel Engine Using Algae Oil Diesel Blend as an Alternative Fuel	23-32
Fabrication of Double Slope Solar Distillation System	33-36
Hybrid Energy Storage with IOT System	37-42
Investigation Of The Properties Of Artificial Marble Produced Using Waste Limra With Polyester Binder	43-46
Cross-domain Data Management: Challenges and Approaches	47-52
Preliminary Comparative Analysis of Polycrystalline Solar Cells and Solar Emulators in Near-Unobstructed Sunlight Conditions	53-58
Improved Ratio Estimators of Population Mean Using Linear Combination of Auxiliary Variable Location Parameters	59-68
Publications on basketball sport: A bibliometric analysis	69-80
An Experimental Investigation of Plastic Fiber Reinforced Self-Compacting Concrete	81-87
Investigation On Characterization Of Liquid Products Obtained By Pyrolysis And Hydrogenation Of Coal From Tévshiin Govi Deposit	88-101
A lifespan decline prediction method of proton exchange membrane fuel cell based on frequency enhanced decomposed transformer	102-115
The Upgrading Problems and Countermeasures of Agricultural Trade Markets Based on the "15 Minute Living Circle"—Taking Duanzhou District Agricultural Trade Markets as an Example	116-120
Social Impact Assessment of Wetlands Conversion on Wetlands Ecosystem Services in Port Harcourt Municipality, Rivers State, Nigeria	121-137
