Abstract

Formulation given in the research review paper is effective to prevent initial stage symptoms & effects of Infectious disease such as Cold Cough Fever & Corona Infection at initial Stage. Utilised Swarna Bhasma is a free radical scavenger which consumes and removes free radicals from the body & produces reactive oxygen species in the body. Silver bhasma is a reduced silver nanoparticle can be used as Anti-bacterial & Anti-viral whereas Loha Bhasma is used for to produced new blood in the body or you can say to fulfil blood requirement in the body.

I. Introduction

The recent pandemic by COVID-19 is a global threat to human health which is caused by Corona Virus. Preventive measure is one of the important strategies to control Corona Virus Infection along with First Aid. Herbal medicinal plants received a noticeable attention to treat Corona Infection Disease which is COVID-19 in Indian subcontinent. In Present Review we are Presenting 2 Medicinal Indian traditional plants with their novel phytochemicals that prevent the novel corona virus Infection. From Many years people used the different parts of Medicinal plants such as *Piper sp.* to cure themselves from several infectious disease.

Here, In the Present Review we are discussing Main Bio-Compounds of Two Bio-Medicinal Plants as Antiviral Agents as First Aid For Covid -19 Disease & Others Viral Infections and Generalised Oral Bio-medicine Route as First Aid Remedies For Corona Initial Stage Infection and Others Viral Infections.

Main Bio-Compounds of Two Bio-Medicinal Plants as Antiviral Agents as First Aid For Covid -19 Disease & Others Viral Infections

Biocompounds & Biomolecules of medicinal plants as antiviral agents are discussed below

Piper nigrum Pinoselinol, guineesine, Chavicine, 1- [(2E, 4Z,8E)-9-(3,4-methylendioxyphenyl)-2,4,8-nonatrienoyl] pyrrolidine, Piperidine, Sesamin, Piperarborenine E, Piperarborenine D, Piperarborenine C, Dehydropiperonaline and piperolein B,

Piper longum Longumosides A (1) and B (2), erythro-1- [1-oxo-9(3,4-methylendioxyphenyl)-8,9-dihydroxy-2E-nonenyl]- piperidine (3), and threo-1-[1-oxo-9(3,4-methylendioxyphenyl)- 8,9-dihydroxy-2E-nonenyl]-piperidine (4) were isolated, besides two new natural products 3b,4a-dihydroxy-2-piperidinone (5), 5,6-dihydro-2(1H)-pyridinone (6). Compounds 2–6, together with the isolates previously obtained with a large amount from *P. longum* involving piperine (7),3,7 1-[1-oxo-5(3-methoxyl-4-hydroxyphenyl)-2E-pentenyl]-piperidine (8),6,10 guineesine (9),3,5 (2E,4E)-N-isobutyleicosa-2,4-dienamide (10),3 piperlonguminine

Generalised Oral Bio-medicine Route as First Aid Remedies For Corona Initial Stage Infection and Others Viral Infections

Piper nigrum 5gm *Piper longum* 5gm make Paste of it.

Add 100 mg Iron Tablet Powder to it & Mix both

Add Rose Petal (Red Desi gulab) 10 gm in the Paste of above written & mix well

Kept this Paste in Fridger at 4 degree centigrade for 2-5 hours for Perfect binding of Biomolecules in the Paste

Kept out Paste from Fridger & add *Alpinia galangal* (Kulanjan) 5 gm to the above paste & Mix well

Kept this Paste in Fridger at 4 degree centigrade for 2-5 hours for Perfect binding of Biomolecules in the Paste

Kept out Paste from Fridger & Add 5gm each Swarn (Gold) Bhashma Chandi (Silver) Bhasma Loha Bhasma to the above Paste & Mix Well

Add 10 ml Hot Boiled water to the above Solution & Mix well

Above Formulation must be entered in to **clinical trial** before enter into National International & Global Market

Utilised this Oral Bio-Medicine FOR Corona INITIAL STAGE INFECTION AND OTHERS VIRAL INFECTIONS

Concluding Remarks

Above Formulation given above is Possibly effective to prevent initial stage symptoms & effects of Infectious disease such as Cold Cough Fever & Corona Infection at intial Stage. Above utilised Swarna Bhasma is a free radical scavenger which consumes and removes free radicals from the body & produces reactive oxygen species in the body. Silver bhasma is a reduced silver nanoparticle can be used as Anti-bacterial & Anti-viral whereas Loha Bhasma is used for to produced new blood in the body or you can say to fulfil blood requirement in the body.
