

Constructing moral education based on the Ideology and moral exemplar of President Ho Chi Minh in technical universities

Pham Thi Cam Ly
Thai Nguyen University of Technology

Abstract

This research article focuses on applying the ideology and moral example of President Ho Chi Minh to moral education at Thai Nguyen University of Technology. We present the implementation of moral education programs, including practical activities such as social projects, volunteer work, and ethical internships. Additionally, we emphasize the role of support and commitment from all parties, coupled with close collaboration with social organizations and businesses. In conclusion, we argue that this endeavor is essential for developing students not only in terms of specialized knowledge but also in ethics and a spirit of community service.

Keywords: morality, Ho Chi Minh's ideology, students, technical.

I. Introduction

In today's world, moral education plays an extremely important role in shaping character and establishing a cultural foundation for young generations. Particularly in higher education, where students are prepared for careers and future life, building an ethical education environment is undeniable. In the context where moral values are being pushed back and need to be respected and promoted, universities, especially technical universities, are facing a great responsibility in guiding and establishing moral principles for the younger generation.

In the field of education, the ideology and moral example of President Ho Chi Minh are a source of inspiration and valuable lessons. President Ho Chi Minh is not only the great leader of the Vietnamese nation but also an icon of morality and patriotism. His moral ideology has been concretized in the implementation of socialism, with core values such as honesty, respect for human dignity, patriotism, and a spirit of serving the people.

President Ho Chi Minh's moral ideology is not only a part of Vietnamese history but also brings valuable values that can be applied in modern education. Technical universities can utilize this ideology to build a comprehensive moral education program. This program not only helps students understand more about moral values and principles but also guides them in applying those values to their lives and careers.

An important aspect of constructing moral education based on the ideology and moral example of President Ho Chi Minh is practical implementation. Students not only need to be taught theory but also need opportunities for practical experience in real-world activities. Participating in social projects, volunteer activities, and ethically oriented internships not only helps students understand more about social responsibility but also cultivates and develops a spirit of service and patriotism.

In the context where moral education is becoming one of the top priorities of universities, constructing moral education based on the ideology and moral example of President Ho Chi Minh is not only a task but also a responsibility of educators and education managers. Only when students are equipped with both specialized knowledge and high moral character can they become good citizens for society and the nation, contributing to the sustainable development of the country.

1. President Ho Chi Minh's Moral Ideology

President Ho Chi Minh is not only a great leader of the Vietnamese nation but also an icon of morality and patriotism. His moral ideology is manifested in the implementation of communism, a social philosophy that he believed would lead the country to strong development and the people to happiness.

One of the prominent features of President Ho Chi Minh's moral ideology is honesty. He always upheld honesty in all his actions and decisions. Honesty is not only a personal quality but also an important principle in

management and leadership. President Ho Chi Minh always encouraged everyone to be honest with themselves and with each other to build a just and transparent society.

Beyond being a leader, President Ho Chi Minh was deeply patriotic. His moral ideology is demonstrated through sacrifice and dedication to the cause of national liberation. He always prioritized the interests of the country and the people, ready to sacrifice himself to bring freedom and happiness to the people.

Furthermore, respect for human beings is also an important value in President Ho Chi Minh's moral ideology. He always valued and respected each individual, regardless of class, religion, or ethnicity. This respect not only forms the basis for a just society but also fosters trust and camaraderie among community members.

Finally, President Ho Chi Minh's moral ideology is also manifested through a spirit of serving the people. He considered serving the people as a sacred responsibility and constantly strived to improve the lives of everyone. This spirit of service has become a shining example for future generations, a great encouragement for those who want to contribute to the country's development.

2. Building a moral education program

Constructing a moral education program based on the ideology and moral example of President Ho Chi Minh is an important part of the mission of technical universities. To achieve this, universities need to integrate moral principles and values into the framework of academic curriculum and extracurricular activities.

One effective way to build a moral education program is through teaching about the social responsibility of engineers. Students need to understand their role not only as technical experts but also as responsible citizens to society and the community. They need to know that their rights and responsibilities go hand in hand, and they have a responsibility to contribute to the sustainable development of society.

Moreover, teaching professional ethics is also an important part of the education program. Students need to be guided on ethical standards in their professions, including honesty, respect for partners, and protection of customer interests. Practicing professional ethics not only enhances personal credibility but also helps build credibility for the entire engineering industry.

Equally important is enhancing education about patriotism and a spirit of service in the curriculum. Students need to understand the history, culture, and traditions of the nation, thereby developing pride and responsibility for the country. At the same time, they should be encouraged and supported to participate in community service activities, from teaching children to participating in social projects.

Additionally, universities need to create opportunities for students to practice and experience ethical values in real-life situations. Engaging in social projects, volunteer activities, and ethically oriented internships helps students apply the moral values they have learned to real-life situations and develop a spirit of service and patriotism.

In conclusion, building a moral education program based on the ideology and moral example of President Ho Chi Minh requires consideration and effort from technical universities. Only when students are equipped with both specialized knowledge and high moral character can they become true engineers and good citizens for society and the nation.

3. Implementing President Ho Chi Minh's Moral example

Implementing President Ho Chi Minh's moral example in moral education for students in technical universities requires not only conveying theoretical knowledge but also promoting actions and applying moral values to real life.

One way to achieve this is through research on the life and career of President Ho Chi Minh. Students need to be encouraged and supported to understand President Ho Chi Minh's actions and viewpoints, thereby gaining inspiration and spirit to apply them to their lives and careers. Through studying President Ho Chi Minh's moral example, students can recognize valuable values and learn valuable experiences about responsibility, respect for human beings, and spirit of service.

Furthermore, implementing President Ho Chi Minh's moral example also requires active participation in social activities and community projects. Students need to be encouraged and supported to participate in volunteer activities, from teaching underprivileged children to participating in environmental protection campaigns. Engaging in these activities not only helps students apply the knowledge they have learned to practice but also helps them develop social skills and foster a spirit of service and patriotism.

Moreover, understanding and applying moral values to daily life is also required in implementing President Ho Chi Minh's moral example. Students need to be encouraged and supported in practicing moral principles in all areas of life, from daily communication to work relationships and social interactions. Practicing these moral values is not only a personal success but also a way to build a civilized society and sustainable development.

In summary, implementing President Ho Chi Minh's moral example in moral education for students in technical universities requires effort and commitment from both students and the institution. Only when students

are encouraged and supported to implement President Ho Chi Minh's moral example in daily life can they become good citizens and true leaders, contributing to the country's sustainable development and society.

4. Creating practical opportunities

Creating practical opportunities is an indispensable part of implementing moral education based on the ideology and moral example of President Ho Chi Minh. Technical universities need to provide a suitable environment for students to apply the moral values they have learned to real-life situations.

One way to create practical opportunities is through social projects. Students can participate in community development projects, from building houses for the poor to improving living environments for the community. Participating in these projects not only helps students apply the knowledge they have learned to practice but also helps them develop communication skills, teamwork, and project management.

Furthermore, volunteer activities are also an important opportunity for ethical practice. Students can join volunteer organizations to support people in difficult circumstances, from teaching free classes to underprivileged children to caring for the elderly and disabled. Participating in these activities helps students develop compassion and empathy, as well as problem-solving skills and working in diverse environments.

Moreover, high-integrity internships are also a valuable practical opportunity. Students can participate in research projects or work for socially committed businesses to apply their knowledge and skills to solving real-world problems. Internships not only provide students with the opportunity to experience real-world work environments but also help them understand their roles and responsibilities in society.

Finally, universities also need to create a diverse, interesting learning and training environment that reflects the moral spirit of President Ho Chi Minh. Organizing discussions, seminars, and extracurricular activities on morality and President Ho Chi Minh's ideology not only helps students understand moral values better but also encourages them to develop pride and a spirit of service.

In conclusion, creating practical opportunities is an essential part of implementing moral education based on the ideology and moral example of President Ho Chi Minh. Only when students have the opportunity to apply moral values to real-life situations can they become useful citizens for society and the nation, contributing to the sustainable development of the country.

Implementing President Ho Chi Minh's moral example at Thai Nguyen University of Technology

At Thai Nguyen University of Technology, a premier technical university in Vietnam, implementing moral education activities based on the ideology and moral example of President Ho Chi Minh has been given special emphasis and actively pursued.

A prime example is the annual program "Engineers for the Community" organized by the university. Through this program, students have the opportunity to participate in social projects through volunteer clubs, the Youth Union, and Student Association of the university, such as building houses for the poor, improving infrastructure for rural areas (road construction), or organizing cultural and educational activities for children (Mid-Autumn Festival, winter clothing donation, summer camps, etc.). The program not only helps students apply the technical knowledge and skills they have learned into practice but also cultivates a spirit of service and patriotism in line with President Ho Chi Minh's ideology.

Moreover, the university regularly organizes volunteer activities such as "Volunteer Day" or "Support program for the disabled". Students can engage in activities such as playing games with orphans, assisting the elderly in shopping, or participating in creating artistic products to raise funds for the disabled. These activities not only help students develop compassion and a spirit of service but also evoke pride in their roles and responsibilities in society.

Furthermore, the university also offers high-integrity internship programs. Students have the opportunity to participate in research projects or work at socially committed enterprises such as recycling plants or environmentally friendly production companies. Engaging in these projects helps students apply their knowledge and skills to solve real-world problems, while gaining a deeper understanding of their roles and responsibilities in society and the nation.

Lastly, discussions, seminars, and extracurricular activities on ethics and the ideology of Ho Chi Minh are regularly organized at the university. Students have the opportunity to discuss and exchange ideas with leaders, professors, and experts on Ho Chi Minh's ideology and its application in their lives and careers.

The university organizes courses and discussions on sustainable development, focusing on technical solutions and technologies to minimize negative impacts on the environment and society, organizing World Environment Day events, waste recycling initiatives. Students are encouraged to propose and implement high-integrity research or application projects to address environmental and social issues.

The university supports and encourages students to participate in entrepreneurship and social enterprise development. Students have the opportunity to learn and apply ethical principles in business management, from

human resource management to developing socially responsible business strategies through study programs, experiential internships, and entrepreneurship competitions.

Additionally, the university provides scholarships and support opportunities for students from disadvantaged backgrounds. Students are encouraged to participate in volunteer activities and share experiences with those in similar situations to create a supportive and cohesive community.

The university organizes discussions, seminars, and major programs on gender and diversity, emphasizing respect and equal rights for all, regardless of gender, religion, or ethnicity. Students are encouraged to participate in social activities to contribute to building a just and equal society.

In conclusion, Thai Nguyen University of Technology has been and continues to implement a series of moral education activities based on the ideology and moral example of President Ho Chi Minh. These activities not only help students develop skills and knowledge but also cultivate a spirit of service and patriotism, thereby contributing to the sustainable development of the country and society.

II. Conclusion

In the current educational landscape, implementing moral education based on the ideology and moral example of President Ho Chi Minh at technical universities like Thai Nguyen University of Technology is crucial for producing students with high technical expertise and ethical awareness, serving the community.

Applying the ideology and moral example of Ho Chi Minh in education not only helps students develop personally but also contributes to the sustainable development of society and the nation. Through practical activities, students have the opportunity to apply the knowledge and skills they have learned to real-life situations and cultivate a spirit of service and patriotism.

However, to effectively carry out moral education, support and commitment from the university, faculty, and students are essential. Furthermore, strengthening partnerships with social organizations and enterprises is crucial to creating a diverse learning and training environment that reflects President Ho Chi Minh's moral spirit. Only with collective efforts from all stakeholders can moral education truly become an indispensable part of student training and contribute to building a civilized, just, and developed society.
